

Improving Productivity with **Infor CloudSuite Industrial** (SyteLine)

CloudSuite™ Industrial (SyteLine) is an end-to-end ERP solution for both discrete and process manufacturers, which includes predictive analytics, collaboration, lean production tools, and integration options. You'll have the tools to increase customer service; improve production and quality; better coordinate aftermarket service and maintenance; and collaborate more effectively.

Get Experience Built-In

Developed by experts in discrete manufacturing, **Infor CloudSuite Industrial** (SyteLine) has more than 30 years of experience built in. You can be confident you've got the tools you need to get the job done, and that you're getting it all from an experienced support team.

With Infor CloudSuite Industrial, you can define your own business processes to make the system your own instead of letting it dictate those processes to you. You'll find it easier to deal with daily disruptions from employees, equipment, and suppliers thanks to the manufacturing best practices and process flows that are embedded within Infor CloudSuite Industrial.

Improving Manufacturing Productivity

What if instead of racing against the clock, you could deliver on time, every time? With fierce competition, you must be able to get to market quickly and do a better job matching up supply with demand. No matter how complex your supply chain, you must respond faster to change, reduce excess inventory, and cut costs. Even more importantly, your customers expect what you promised, when you promised it. You can deliver all this and more with an ERP solution that helps you improve productivity—both in the office and on the shop floor. Infor® CloudSuite Industrial (SyteLine®) is that ERP solution.

Make Better Decisions, Faster

What if you could know the exact delivery date when an order is placed? What if you could order what you need at the time you need it? And what if you knew in advance how an unplanned order would affect your other customer orders, capacity, material requirements, and cost of manufacturing?

Meet Your Unique Needs

With Infor CloudSuite Industrial, you can do all that and more. You'll no longer have to deal with unreliable, outdated processes for monitoring customer demand, scheduling delivery dates, and tracking resources. You can see everything you need to see at the time it happens, so you can make better decisions, faster. No matter the size, scope, or scale of your company, Infor CloudSuite Industrial can be configured to meet your company's operational needs.

You'll be able to:

- **Make it your own**—Fine-tune your ERP system on the fly and create a tool that solves your day-to-day business challenges, quickly and efficiently.
- **Get back to work**—When an unexpected order parachutes onto your production floor, you can adjust your current schedule so you can deliver all of your orders on time, without interruption.
- **Be confident**—You'll know you have the tools you need to get the job done. And you'll know you're getting them from an experienced team that has what it takes, knows what to do, and knows manufacturing.

Operate More Efficiently

Whether you are a small to mid-size manufacturer with mixed mode processes or an enterprise-size OEM with a complex MTO and ETO business model, Infor CloudSuite Industrial can help you operate more efficiently.

Experience Industry-Specific Functionality

Advanced planning and scheduling (APS)—Find out if you have the materials, people, machines, and tools you need to manufacture an item. And continually monitor demand as it occurs. Before you commit to an unplanned order, see the ripple effect it will have on your schedule and your shop floor, so you can reset expectations with existing customers. If a machine goes down, you can update production schedules quickly. In the process, you'll boost productivity, improve order accuracy, increase on-time delivery-and keep your customers happy.

Complex product configuration—Make sure your production department can handle configured orders and that you can provide accurate configured orders to customers.

Materials and inventory management—Would you like to reduce your inventory while avoiding shortages? With Infor CloudSuite Industrial, you can buy what you need, when you need it. You can also do away with side systems, which are difficult and costly to maintain. Plus you can shorten order entry time, eliminate duplicate orders, cut down on costly data entry errors, and make sure data is consistent-leaving you with more time to grow your business.

Customer management—Manage all aspects of your relationships with customers and prospects, from estimating to invoicing.

Application event system—Customize your system without modifying your source code, and improve your workflow in the process. When you upgrade your system, you'll automatically upgrade your customizations at the same time.

Microsoft®-based system—With familiar tools and common navigation, you'll save time on implementation, customization, and training. Plus your IT staff will be able to focus on strategic projects rather than tactical issues. Not only that, you'll be able to draw from a huge talent pool that knows how to work with a Microsoft-based system.

Educational tools—Get your Infor CloudSuite Industrial users up to speed quickly with Infor Implementation Accelerator and Infor Campus, an Internet-based learning solution. You'll speed up implementation and reduce the burden on your IT staff.

Role-based information—Get all the information you need to do your job in a single screen. For example, if you're a production planner, you'll get data that helps you manage planned vs. actual production, unplanned scrap by reason, resource utilization, and on-time completion.

Better user experiences—Personalize your user interface (UI) to fit your particular industry, team, or an individual user. Add, remove, and edit fields, labels, and complete screens without having to call on IT for help. Get the information you need, when you need it, with easy-to-use grid forms. Plus, reduce or eliminate costly modifications to personalized features when you upgrade your system.

Easy integration of new companies—If you bought a new business today, could you have it up and running quickly? With Infor CloudSuite industrial, you can add a new company to your organizational structure, replicate your data, and be good to go—while you continue business as usual. Plus, when you sell off an old business, you can easily separate data. And you can go to one place for financial information, since your financial reporting solution is integrated.

Deploy your solution safely and securely in the cloud

You can deploy Infor CloudSuite Industrial on-premise or in the cloud. To deploy in the cloud, all you need is an Internet connection and a subscription to cloud-based Infor CloudSuite Industrial. Plus, you can expand Infor CloudSuite Industrial to any location you want—without IT involvement— thanks to Infor’s advanced cloud computing technology. Best of all, you can combine and multiply the performance-enhancing and cost-cutting benefits of Infor CloudSuite Industrial by subscribing to it through the Infor cloud computing platform.

Get the power of Infor CloudSuite Industrial along with:

Reliability and guaranteed performance—Attain the processing power and bandwidth you need to keep your business running.

No need to buy hardware—Concentrate on your business instead of technical details. When you run CloudSuite Industrial as an Infor cloud computing solution, your account will be hosted on datacenters that are maintained and optimized by certified experts.

Security—Survive and keep operating in any worst-case scenario with the help of full redundancy and world-class disaster recovery systems. Plus, get the latest and most powerful defenses against intrusion, hacking, and unauthorized access.

Unlimited, instantaneous growth potential—Get your business software solution to your expanded facilities and new locations ahead of you—with as many seats and sites as you need—anytime, anywhere.

Get Quick Results

Complexity and competition continue to increase in discrete manufacturing. Personalize your enterprise resource planning system, focus on your work, and be confident you’ve got the right software and support team for the job—all with Infor CloudSuite Industrial.

Feel Confident

With Infor CloudSuite Industrial you can feel confident you’ve got the tools you need to get the job done—and that you’re getting it all from an experienced support team. Personalize your enterprise resource planning system, focus on your work, and be confident you’ve got the right software and support team for the job.

Because built-in processes go to work for you immediately, you’ll:

- Go to market faster.
- Deliver products on time.
- Do more with less.
- Reduce the impact of change.
