

Take the Risk out of Your Supply Chain with Best-in-Class PO Lifecycle Management

Turn PO Lifecycle Management into a Competitive Advantage with SourceDay.

Up to 70% of supply chain issues happen before shipment. But you can't fix what you can't see. SourceDay provides real-time visibility and buyer/supplier collaboration across the entire PO lifecycle.

100% accurate PO data – from issue to inventory

Automated PO management eliminates human error and delivers current, reliable data to any ERP system.

De-risking critical areas of the supply chain

State-of-the-art Artificial Intelligence/ Machine Learning (AI/ML) predicts risks, recommends resolutions, and turns manual processes into precision workflows.

Accelerating processes and time to value

Better supplier collaboration and visibility bring predictability to a process teeming with disruption.

PO LIFECYCLE MANAGEMENT:

Gain full visibility into every stage of your PO process and make data-driven decisions.

ACTIONABLE SUPPLIER ANALYTICS:

Recognize strengths and areas for improvement – and get recommendations to optimize supplier performance.

ORDER ACCURACY:

Automatically compare records and resolve discrepancies for better planning and scheduling.

LOWER RISK OF UNNECESSARY COSTS:

Track all changes in one place so teams can reduce miscommunications that cause cost overruns.

ON-TIME DELIVERY:

AI/ML delivers real-time data accuracy, expedited actionability, and up to 96% on-time parts delivery.

IMMEDIATE ACCESS TO CURRENT DATA:

Maximize existing ERP with easy access to accurate, current PO-related information.

80%
BETTER

Achieve 50-80% efficiency gains in critical buyer/supplier collaboration during PO lifecycle management.

22%
LOWER

Reduce buffer stock by up to 22%, leading to optimized working capital and a smaller warehouse footprint.

70%
FASTER

Slash the days needed to process PO-based invoices by 70%, capturing more discounts and cutting costs.
